U.S. Embassy Supplied Photos For JFK Play

BONN, Nov. 18 (AP) — The U.S. Embassy confirmed today that it had supplied some photographs of President John F. Kennedy for a play about his assassin which a U.S. veteran's group attacked as irresponsible.

An Embassy spokesman said the pictures had been supplied from the public files of the U.S. Information Service.

The Jewish War Veterans said in Washington on Tuesday the Embassy had shown lack of judgment by helping playwright Felix Lutzkendorf stage his play based on the Warren Commission's report. It also said the Embassy had supplied U.S. Marine uniforms.

The Embassy said the producers had approached the Marines "at working level" and borrowed two uniforms which they used as models for costumes. The real uniforms were not used by the actors, the spokesman said.
